If you have read our previous manual ‘Creating and Using the Fabcoin Wallet in Windows’ you will need to read through this manual to learn how to send & receive your 0.1 FAB in the Testnet Wallet. 如果您查看之前的手册“在Windows系统中创建和使用发币钱包”，您需要阅读如何在测试网钱包进行发送和接收您的0.1发币

It is important that when you send your request to receive FAB to our email, [info@fa.biz](mailto:info@fa.biz), that the wallet address you provide starts with a letter such as ‘m’ or ‘n’, NOT a ‘1’ or ‘3’. Please put in the subject: “Request for Testnet Fabcoin”.

Step 5 : Copy the address which is displayed & share it with receiver so that he/she can send fabcoin

第五步：复制下列显示出的您的地址，并分享给接收者，由此对方可发送发币

Note: if the address belongs to the Mainnet it will start with numbers '1' or '3'. But in this case it belongs to testnet so it starts with a character like 'm' or 'n'. Based on the starting digit we can tell which environment the address belongs to.

注意：如果地址属于Mainnet的话，地址开头将会是1或3。而这里属于测试网，所以地址开头是m或n这样的。基于这个开头的第一位我们可以判断出地址属于哪个环境。
